# 360 SMS APP

Release Notes (Summary)

Version: 1.267

360 DEGREE CLOUD TECHNOLOGIES PVT. LTD.

# Contents

# Release Notes- 1.267

## Enhancements:

### Improved Auto-Sync Feature

We introduced a new Twilio API in the last package (1.266). But Twilio WhatsApp had a problem: assigned numbers didn't update when sending templates. So, we had to delete and recreate records.

With the new package installed, manual number re-assignment is unnecessary. Numbers will synchronize automatically.

**Note:**

- After installing the package, the user simply clicks the "Outgoing & Incoming Setup" button in the SMS Setup section to initiate the sync.

- The script will execute once after the package upgrade, updating all records.

### Sinch Provider Delivery Changes

Before, delivery status for Sinch-Line messages didn't update on SMS History. Now, after an update, it's consistently resolved.

## Minor Bug Fixes:

This release includes minor bug fixes to enhance app stability and performance.
